Dear Josh,

I'm enclosing the detailed analysis of clones from fertile exconjugants you asked for some time ago. The seven symbols indicating recombinant types are in the order T, L, Az, T5, Lac, Gal, and Motility, + for the Hfr and - for the F- strain.

Since I'm also including a brief discussion of your data, I'd appreciate knowing whether I've gotten your numbers right.

Best wishes to you and Esther for the Holidays!

Sincerely,

A handwritten signature in cursive script that reads "Tom".

Thomas F. Anderson
